

Attachment for JLG

JLG Telehandler Attachment - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Freshly retired, after spending several years working with his brother to manufacture their crane company into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

Whilst on their trip, John spent time conversing with former business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a vast market for a product that could quickly and safely lift individuals in the air to accomplish maintenance and other building functions.

After returning from their trip, John set up a partnership with two of his friends and obtained a metal fabrication business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design essentials of that original lift into existing designs.

JLG lift trucks have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the business proudly continues to expand itself into different markets globally and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer atmosphere.
